Connecting to Millikin’s Wireless Network
Instructions for Mac OS X 10.6 Snow Leopard

1. Select your **wireless icon** by the clock and select **MU-RESNET**.

2. Enter in AT\your user name and your password as shown in the picture and click **ok**.
3. You should be connected at this point, but it may need to be restarted to complete the connection process. To do this, select your **wireless icon** and select **Open Network Preferences**...

4. Select the button **Turn Airport Off**, and then select **Turn Airport On**. You may also want to try restarting your Mac.
