Windows 8 Wireless Setup – Millikin University Secured Network

1. Start on the main desktop screen. Right click on the Wi-Fi symbol...

2. ... and select “Open Network and Sharing Center.”
3. Select “Set up a new connection or network”

4. Select “Manually connect to a wireless network”
5. Enter this information exactly, then hit “Next”

6. You will get this screen. Now select “Change connection Settings”
7. On this screen UNCHECK the box next to “Remember my Credentials,” then select the “Settings” button in the middle of the screen.

8. Select the “Configure...” button located towards the bottom of the dialogue box
9. UNCHECK the box that shows up and make sure that your screen looks like this one. Hit “OK”

10. Make sure that the checkbox at the very top of the screen (“Verify the server’s...”) is also UNCHECKED. Select “OK”.
11. When you return to this screen, select “OK”.

12. Now close out of this dialogue box by selecting the “Close” button.
13. Close out of Network and Sharing Center, and LEFT click the “Wifi” icon.

14. Students: Select MU-RESNET
   Employees: Select MU-ADMIN
15. Click the “Connect button”

16. Enter your Millikin University Credentials and select “OK”
If the above settings do not work for you, use these troubleshooting tips:

T1. Select the Wi Fi symbol.

T2. In the Networks list, right click the appropriate network. (RESNET for Students, ADMIN for Employees)
T3. Select “View connection properties“

T4. In the Wireless Network Properties box, change the Security type and Encryption type exactly as you see them above. Select OK.

T5. Select the Wi Fi Symbol again, and select the appropriate Network
Students select MU-RESNET
Employees select MU-ADMIN
